

JASPER LEE

San Jose, CA | (515) 735-8349 | yaoweilee96@gmail.com | [LinkedIn](#)

SUMMARY

Quality Engineer with 5+ years of experience in test automation, data pipelines, and ML evaluation infrastructure. Specialized in end-to-end quality evaluation pipelines, model benchmarking, and statistical scoring at scale.

SKILLS

Languages & Tools: Python, SQL, Bash, Git, Mercurial, VS Code, AI Assisted Coding (Claude Code)

Testing: E2E, Regression, Test Framework Development, A/B Evaluation Design, Automated Report Generation

Data & Infrastructure: XDB (DynamoDB), DataSwarm (Airflow), Presto/Hive, Manifold (S3), Unidash (Tableau), Pandas, NumPy, Matplotlib

ML & Evaluation: Pipeline Benchmarking, CV Model Evaluation, Human Annotation Orchestration via Halo (Scale AI), Statistical Scoring

PROFESSIONAL EXPERIENCE

Meta (Contractor) — Burlingame, CA

Quality Engineer (XR Codec Avatars) | June 2025 – Present

- Informed release decisions across 13 [3D Codec Avatar](#) model releases by designing and executing hotspot test plans across 16 categories and 450 subjects.
- Benchmarked real-time avatar driving quality across 8 motion failure modes (lipsync, pose plausibility, motion jitter, and more), tracking month-over-month improvements and regressions.
- Cut results turnaround from 24+ hours to under 1 hour by automating a Python test pipeline handling uploads, state tracking, and annotation for 800+ videos per batch.
- Unified regression tracking across 16 hotspot categories and 450 subjects by collaborating with senior engineers to build an issue-tracking framework, consolidating 550+ quality issues from 3 fragmented sources into a single dataset.
- Pinpointed quality failures at the per-subject and per-question level for the algorithm team to target fixes, by building interactive JavaScript reports with score breakdowns, heatmaps, inter-rater reliability, and fairness analysis.

Apple Inc (Contractor) — Sunnyvale, CA

Software QA Engineer (Video Engineering) | Nov 2024 – April 2025

- Designed 60+ test cases (FP/TP metrics) to identify 15+ critical CV model issues across iOS and Vision Pro, driving bug fixes.
- Analyzed CV model behavior (4 Body Tracking) with precision/recall, uncovering 10+ inconsistencies and expanding QA database with 300+ aggressor cases.
- Automated device configuration and data collection via Bash scripts, reducing setup time by 50% and standardizing data packages.

Zoom Video Communications — San Jose, CA

Software QA Engineer (Audio Team) | July 2022 – Jan 2024

- Developed 20+ modular features for Zoom's E2E test framework (Python, SQL, YAML); scaled infrastructure for Meetings and Phone, increasing coverage by 30% and achieving 40% faster test runs.
- Built an internal audio library by analyzing 1,000+ recordings with Python feature extraction (SNR, MOS score), decreasing audio complaints by 25%.

Cisco Systems, Inc — San Jose, CA

QA Engineer | Oct 2020 – July 2022

- Automated lab inventory management, switch port configuration, and test monitoring with Python, reducing testing time by 30%. Resolved 10+ EMC design failures to ensure FCC/CE compliance for Cisco Catalyst products.

EDUCATION

Iowa State University — BS in Electrical Engineering | December 2018
